

Morpheus8V / FormaV / VTone Pre and Post Treatment Guidelines

PRE-TREATMENT

- The patient should shave the area 2-4 day, not waxed or chemically removed, prior to treatment.
- Remove any jewelry in the treatment area.
- The patient should empty the bladder prior to the treatment procedure.

POST TREATMENT

- Immediately following the procedure, the area should be gently cleaned and patient should urinate to prevent possibility of UTI.
- Patient should avoid submerging in very hot water for 2 days after the treatment.
- Patient should avoid mechanical contact with the treated area for 2 days.
- Should you desire, we offer prophylactic HSV treatment for all patients.
 - Valtrex 500 mg orally twice daily for 2 days
- Patient should contact physician if there is any indication of infection, excessive swelling, redness, pain, or any other unusual or unpleasant symptoms.
- A tingling heat sensation may be felt after the treatment. This is normal.

TREATMENT SCHEDULE

- **Morpheus8V** - the number of treatment sessions depends on the individual patient and is typically about 3-5 treatment sessions, every 3-6 weeks apart but can vary according to patient response.
- **FormaV** – the number of treatment sessions depends on the individual patient and is typically about 3 treatment sessions, every 4-6 weeks apart but can vary according to patient response.
- **VTone** – the number of treatment sessions depends on the individual patient and is typically about 6 treatment sessions, every 1-3 weeks apart but can vary according to patient response.
